Male Green Woodpecker, by Edmund Fellowes / BTO

Introduction

Please use this list to look up the species codes needed when completing the Other Wildlife Recording Form, which covers all of the bird and other wildlife species not on the main paper count form. If you find that the species you want is not on this list, first check to make sure that it is not one of the 42 species on the main count form. If not, please use the code '99999' and enter the name of the species in pencil on the form. The GBW Team will then add the appropriate code when the form is received at the GBW office.
